Special nozzle for massage bathtub

The powerful spa nozzle inside the Jacuzzi is designed by a famous German teacher. It is completely distributed according to the anatomy of the human body. It can massage the neck, waist and legs of the human body with strong water flow, which can accelerate the blood circulation of the human body and quickly alleviate the fatigue of the human body.

Water Pump

Working principle of massage water pump: the massage water pump sucks the water in the bathtub through the water return device to pressurize, and then chaos is strong mixed water flow of steam and water from the nozzle to impact and massage your different accoints, so as to promote blood circulation and eliminate fatigue. European and American shell design, good heat dissipation performance, low noise, large water flow, excellent quality (CCC certification), stable performance, and the water supply room is completely separated from the room, safe and reliable.
